

Cisco Devices for Microsoft Teams Rooms

The Teams experience you know, on Cisco collaboration devices you'll love.

Experience native Microsoft Teams meetings on a set of certified collaboration devices for any workspace across your organization—from the desk to the large conference room.

In addition to RoomOS, Cisco is enabling a full-featured Microsoft Teams Rooms (MTR) experience on select desk and room hardware solutions. The choice is yours: use the Webex collaboration experience alongside powerful video interoperability or run your device as a native Microsoft Teams system while still having access to feature-rich Webex meetings.

Enjoy an elevated Microsoft Teams room collaboration experience powered by device intelligence, hassle-free admin, and engaging design embedded into a selection of certified, next-generation Microsoft Teams Rooms systems, Microsoft Teams Displays, and Microsoft Teams Panels from Cisco.

Why Cisco devices for Microsoft Teams

Reimagine workspaces

Enjoy intelligent workspaces designed for hybrid work with devices for every workspace

Freedom of choice

Get the full value of Microsoft Teams Rooms and fully featured Webex meetings

Intelligent meetings

Benefit from built-in audio and camera intelligence for more inclusive meetings

Expert workspace management

Manage devices in Teams Admin Center and get access to Control Hub advanced management and analytics

A familiar Microsoft Teams experience

Experience the full value of Teams meetings on certified Cisco video endpoints for any workspace—from the desk and focus rooms to ideation spaces and large boardrooms.

Get fully featured Webex meetings

Join feature-rich Webex meetings and access third-party apps even when you are running the device in native Microsoft Teams mode.

Breathtaking camera views

Leverage optimized people framing and intelligent views to create more equitable, true-to-life meetings that levels the playing field for every participant.

No distractions, just crisp sound

Block out unwanted background noises and enjoy crystal-clear sound to ensure frictionless and productive collaboration with sophisticated audio controls.

Vibrant presentations

Transform your presentations with powerful content sharing via a single USB-C cable or wirelessly with Webex, Miracast, or Apple AirPlay.

Intuitive controls at your fingertips

Join your next meeting with a single touch and benefit from built-in room sensors to track occupancy and workspace conditions.

Enhance workspace management

Streamline cloud device management with a single view of all device endpoints and rich workspace analytics in Control Hub, alongside Teams Admin Center.

Seamless onboarding

Easily configure the devices for native Webex and industry-leading video interop on RoomOS or run native Microsoft Teams Rooms, without the hassle.
